Service Engineer Job Description

Job Title: Service Engineer

Location: Plzeň, CZ

Department: Engineering

Role Purpose

To lead commissioning of required services to BRUSH equipment.

SECTION 1 – Key Responsibilities

- Conduct fault diagnosis and rectification of control equipment.
- Undertake assignments involving either generators or Prismic systems.
- Carry out electrical testing on high and low voltage windings in the field.
- Interpret specifications and technical requirements of an assignment brief and represent at customer technical meetings.
- Train customers' personnel, subcontractors and other members of service organisation.
- Ensure assignments are monitored and delivered in accordance with expenditure and project schedules.
- Effectively communicate and keep updated customer representatives and BRUSH project managers.
- Prepare method statements and risk assessments in relation to client sites.
- All employees have a legal duty to take reasonable care for the health and safety of themselves and of others who may be affected by their acts or omissions at work and to observe and follow the relevant systems, rules and methods of working.
- Ensure all data protection activities of personal and special category data; pertaining to current employees, customers and all other external stakeholders, are done so in line with the company's data Protection Policy.
- The job description is not to be regarded as exclusive or exhaustive and you may be required to undertake various duties as may reasonably be required of you by the Company.

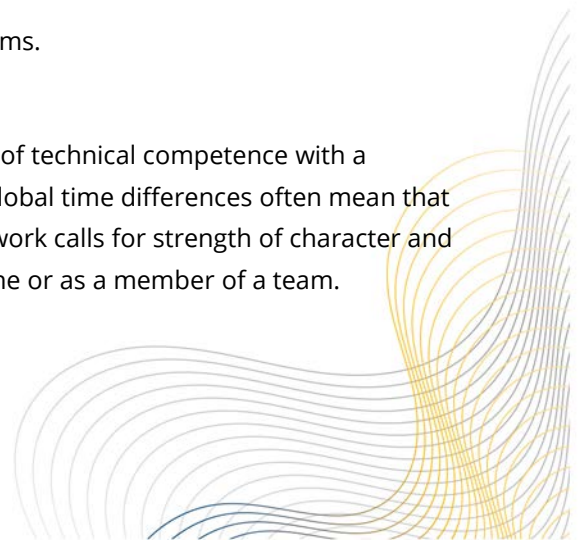

SECTION 2 – Person Specification

Qualifications or Functional Experience

- University Degree in Electrical or Mechanical Engineering.
- Knowledge of electrical power generation and distribution systems.

Knowledge/Skills

- This is a challenging and important role requiring a high degree of technical competence with a corresponding level of self-sufficiency and resourcefulness, as global time differences often mean that factory support is not immediately available. The nature of the work calls for strength of character and physical fitness. Differing assignments may require working alone or as a member of a team.

Personal Attributes

- Self-sufficient, resourceful and a problem solver with well-developed commercial awareness.
- Strength of character and high levels of energy.
- An effective communicator, fluent in both spoken and written English.
- Clear understanding of cultural differences and has the diplomacy to cope with aspect of the role.
- Able to undertake extensive overseas and offshore working, in addition to attending at sites in the UK, often for protracted periods.
- Experienced in representing the Company at customers' sites and operating remotely on own initiative whilst observing the requirements set down in the Company's Code of Conduct for Service/Commissioning Engineers.
- Able to work with Company's rules and guidance notes on health and safety, including operation of safe systems of work in relation to high voltage and medium voltage electrical systems and work in a heavy industrial environment.
